

William Jacob Management Completes PE for Arctic Engineering

Houston, TX – August 27, 2014 – William Jacob Management, Inc. (WJM) an Engineering and Project Management service provider for the oil and gas industry, today announced that Edward Snyder, Manager of Instrument Engineering, successfully completed the University of Alaska course in “Fundamentals of Arctic Engineering” during the month of May, 2014.

The course is a prerequisite for securing an Alaska professional engineering license. On August 20, 2014, Ms. Sarena E. Hackenmiller, Licensing Examiner with the Alaska Board of Architects, Engineers & Land Surveyors officially notified Mr. Snyder that his application for license as a Registered Engineer for the State of Alaska was approved.

Mr. Snyder has over 40 years of experience in designing, purchasing and commissioning instrumentation systems for both onshore and offshore facilities. Additionally, this has resulted in detailed design of safety systems to be in compliance with various federal and state regulations. Ed holds a Bachelor of Science in Math and is a registered professional engineer in the states of Texas and Alaska and has a current license from the T-2 API offshore safety school.

"This is a great accomplishment for both WJM and Ed as we continue to pursue projects in arctic regions such as Alaska and the Russian Sakhalin Islands," said William Jacob Management's president and owner, Michael Duffy.

WJM ARCTIC PROJECT EXPERIENCE:

BP Liberty Drilling Rig, ExxonMobil Sakhalin Island I - Berkut platform, Furie Kitchen Lights.
WJM most recently completed a FEED study for an Enhanced Mobility Land Rig that will work in an arctic region for an undisclosed client.

About William Jacob Management

Headquartered in Houston, Texas, William Jacob Management, Inc. is an independently owned, Engineering and Project Management services firm. WJM provides full lifecycle support for the most demanding and complex capital projects in the energy industry, and is recognized for its elite-level proficiency in interfacing drilling and production facilities.
