ENGINEERING & PROJECT MANAGEMENT SOLUTIONS

MHA ENGENHARIA LTDA. and William Jacob Management Form an Alliance

Houston, TX – MHA ENGENHARIA LTDA. (MHA) and William Jacob Management, Inc. (WJM) announce the signing of a cooperation agreement under which the companies will mutually deliver complimentary engineering, project and construction management services for upstream, midstream and downstream oil and gas facility projects. These engineering services include basic, detail engineering and FEED studies for fixed and floating production and drill rig facilities, project and construction management, project controls, procurement, inspection, commissioning.

The strategic partnership leverages MHA's expertise and engineering capability in the Brazilian market with WJM's proven execution of high stakes capital projects, such as Peregrino, Polvo, Azurite, Berkut and the breakthrough modular offshore rig facility (MORF). The complimentary expertise of both companies will target projects where onshore and offshore production facilities or drilling facilities are in need of engineering services.

Under the agreement, WJM will also provide engineering and project management services to complement and strengthen the execution teams of MHA's projects.

The alliance will secure a unique combination of technical proficiency and operational capabilities sustaining a strong focus on innovative technical solutions that will improve operating results for customers. Ultimately, this alliance will provide an extended footprint for both firms, which have a market presence in major hubs throughout the oil and gas industry. This will, in turn, improve proximity to customers and enable diversity in locations for our complimentary engineering and project teams.

About MHA ENGENHARIA LTDA.

MHA ENGENHARIA has 42 years of experience as a multidiscipline engineering firm, with more than 2800 projects and 10M man-hour in projects. MHA ENGENHARIA provides full spectrum engineering design and has extensive experience in petroleum and petrochemical facilities, industrial complexes, hospitals, hotels, shopping centers and construction management in several countries.
